OO Code Review Report

This table contains the overall information of code review report.

Flow count	System properties	System accounts	Error count	Warning count
4	1	1	445	260

OO Code Review Details

This table contains all issues information of each variables.

Step	Variable Type	Name	Assign From	Default Value	Remarks
Read Email	Input Variable	host		outlook.office365.com	Varible is defined but not assigned
Read Email	Input Variable	folder		InformaticaDemo	Varible is defined but not assigned
Retrieve User ID	Input Variable	request		self	Varible is defined but not assigned
Retrieve User ID	Input Variable	DBServerName		localhost	Varible is defined but not assigned
Retrieve User ID	Input Variable	DbType		PostgreSQL	Varible is defined but not assigned
Retrieve User ID	Input Variable	Username		postgres	Varible is defined but not assigned
Retrieve User ID	Input Variable	Password			Varible is defined but not assigned
Retrieve User ID	Input Variable	instance			Varible is defined but not assigned
Retrieve User ID	Input Variable	DBPort		5432	Varible is defined but not assigned
Retrieve User ID	Input Variable	Database		postgres	Varible is defined but not assigned
Retrieve User ID	Input Variable	authenticationType			Varible is defined but not assigned
Retrieve User ID	Input Variable	dbClass			Varible is defined but not assigned
Retrieve User ID	Input Variable	dbURL			Varible is defined but not assigned
Retrieve User ID	Input Variable	Command		SELECT "EId","Ename" FROM public."AutomationTable" where "MailAddress"='${emailAddress}';	Varible is defined but not assigned
Retrieve User ID	Input Variable	Delimiter		||	Varible is defined but not assigned
Retrieve User ID	Input Variable	Key			Varible is defined but not assigned

Retrieve User ID	Input Variable	timeout			Varible is defined but not assigned
Retrieve User ID	Input Variable	databasePoolingProperties			Varible is defined but not assigned
Retrieve User ID	Input Variable	resultSetType			Varible is defined but not assigned
Retrieve User ID	Input Variable	resultSetConcurrency			Varible is defined but not assigned
Retrieve User ID	Input Variable	ignoreCase		true	Varible is defined but not assigned
Retrieve User ID	Input Variable	DBServerName		localhost	Varible is defined but not assigned
Retrieve User ID	Input Variable	request		other	Varible is defined but not assigned
Retrieve User ID	Input Variable	DbType		PostgreSQL	Varible is defined but not assigned
Retrieve User ID	Input Variable	Username		postgres	Varible is defined but not assigned
Retrieve User ID	Input Variable	Password			Varible is defined but not assigned
Retrieve User ID	Input Variable	instance			Varible is defined but not assigned
Retrieve User ID	Input Variable	DBPort		5432	Varible is defined but not assigned
Retrieve User ID	Input Variable	Database		postgres	Varible is defined but not assigned
Retrieve User ID	Input Variable	authenticationType			Varible is defined but not assigned
Retrieve User ID	Input Variable	dbClass			Varible is defined but not assigned
Retrieve User ID	Input Variable	dbURL			Varible is defined but not assigned
Retrieve User ID	Input Variable	Command		SELECT "EId","Ename" FROM public."AutomationTable" where "Ename"='${extractedName}';	Varible is defined but not assigned
Retrieve User ID	Input Variable	Delimiter		||	Varible is defined but not assigned
Retrieve User ID	Input Variable	Key			Varible is defined but not assigned
Retrieve User ID	Input Variable	timeout			Varible is defined but not assigned
Retrieve User ID	Input Variable	databasePoolingProperties			Varible is defined but not assigned
Retrieve User ID	Input Variable	resultSetType			Varible is defined but not assigned
Retrieve User ID	Input Variable	resultSetConcurrency			Varible is defined but not assigned
Retrieve User ID	Input Variable	ignoreCase		true	Varible is defined but not assigned

PowerShell Script	Input Variable	script		$requestType="${category}" $request="${request}" if($requestType -eq "GrantAccess") { if($request -eq "self") { write-output " Server access provided successfully for ${eName}" } else { write-output " Server access provided to ${eName} as requested" } } else { if($request -eq "self") { write-output " Server access removed successfully for ${eName}" } else { write-output " Server access removed for ${eName} as requested" } }	Varible is defined but not assigned
Send Notification	Input Variable	SMTPServer		smtp.swinfra.net	Varible is defined but not assigned
Send Notification	Input Variable	MailType		html	Varible is defined but not assigned
Send Notification	Input Variable	Attachments			Varible is defined but not assigned
Send Notification	Input Variable	From		ooautomation@microfocus.com	Varible is defined but not assigned
Send Notification	Input Variable	Cc			Varible is defined but not assigned
Send Notification	Input Variable	Bcc			Varible is defined but not assigned
Send Notification	Input Variable	Subject		Auto Reply: Access Request: Success	Varible is defined but not assigned
Send Notification	Input Variable	Body		<pre> Hi, Request to grant/revoke access is successful. Message from system:${returnResult} Regards, OO Automation Please do not reply, this is auto generated email </pre>	Varible is defined but not assigned
Send Notification	Input Variable	username			Varible is defined but not assigned
Send Notification	Input Variable	password			Varible is defined but not assigned
Send Notification	Input Variable	port		25	Varible is defined but not assigned
Send Notification	Input Variable	characterSet			Varible is defined but not assigned
Send Notification	Input Variable	contentTransferEncoding			Varible is defined but not assigned

Send Notification	Input Variable	SMTPServer		smtp.swinfra.net	Varible is defined but not assigned
